7 The diagram shows a right-angled triangle and a quarter circle.

The right-angled triangle ABC has angle $ABC = 90°$
The quarter circle has centre C and radius CB.

Work out the area of the quarter circle.
Give your answer correct to 3 significant figures.
You must show all your working.

Radius $CB^2 = AC^2 - AB^2 = 9^2 - 6^2 = 45$.

Quarter-circle area $= \pi r^2/4 = 45\pi/4$

$\approx 35.3429... \text{ m}^2 = 35.3 \text{ m}^2$ (3 s.f.).

4 marks total
Pythagoras difference
$r^2=45$
$\pi r^2/4$
35.3 m^2

..... m^2

(Total for Question 7 is 4 marks)
