16 There are only 5 blue cards, 2 green cards and 4 red cards in a pack.

Isabella is going to take at random one card from the pack.

(a) Write down the probability that Isabella will take a blue card.

Total cards = 5 + 2 + 4 = 11.

P(blue) = 5/11.

2 marks total
11 equally likely cards
5/11

(2)

Ken is going to throw a biased dice once.
The probability that the dice will land on six is 0.3

(b) What is the probability that the dice will **not** land on six?

P(not six) = 1 – 0.3 = 0.7.

1 mark
Complement 0.7

(1)

(Total for Question 16 is 3 marks)
