20 Akhtar, Ben and Carl each have some money.

Akhtar has £65
Ben has £100
Carl has three £5 notes, one £20 note and some £10 notes.

The mean amount of money per person is £80

How many £10 notes does Carl have?

Total money = 3 × £80 = £240.

Akhtar and Ben have £65 + £100 = £165.

Carl has £240 – £165 = £75.

Three £5 notes + one £20 note = £35.

£75 – £35 = £40 in £10 notes; 40 ÷ 10 = 4.

4 marks total
Total £240
Carl £75
Other notes £35
Four £10 notes

.....

(Total for Question 20 is 4 marks)
