Question	Answer	Mark	Mark scheme	Additional guidance
25	7	P1	process to use gradient eg $y = 3x + c$ **or** $c = -6$ **or** $\frac{15-9}{d-5}$ **or** $(15 - 9) \div 3$ **or** (6, 12)	Condone use of a letter other than *d*, for *d*
		P1	(dep) full process to rearrange equation formed to isolate *d* eg rearrangement of $15 = 3d - 6$ or $3 = \frac{15-9}{d-5}$ **or** for $5 + \frac{15-9}{3}$	Must show processes to get as far as $d =$ Award P2 for an answer of (7, 15)
		A1	cao
