19	25, 30, 17	M1	for starting to express amounts as expressions eg $x - 8$ **or** a correct trial eg 9 + 14 + 1	Expressions can be based on Adam, Bethany or Charles as the unknown
		M1	for a correct equation eg $x + x - 8 + x + 5$ (= 72) **or** for a correct trial totalling 72 eg 25 + 30 + 17	
		A1	for correct points attributed to at least one person eg Adam =25 or Bethany = 30 or Charles = 17 (must have clear association of name to figure) **or** correct solution to the equation eg $x = 25$	These do not necessarily need to be the names, as long as the association is unambiguously clear.
		B1	for all three correct
