15	$8n - 10$ and explanation	P1	for expanding one bracket correctly eg $4n^2 + 4n + 1$ or $4n^2 - 4n + 1$ **or** $[2n + 1 + 2n - 1][2n + 1 - (2n - 1)]$	
		P1	for a start on simplifying eg $4n^2 + 4n + 1 - 4n^2 + 4n - 1 - 10$ **or** $4n \times 2$	
		P1	for fully simplifying eg $8n - 10$	This mark is awarded for showing the simplification of two trinomials.
		C1	for explaining why $8n - 10$ cannot be a multiple of 8	This mark is dependent on full working shown, leading to $8n - 10$
