13	31 with reasons	B1	for *ADB* = 62	
		M1	for 180 – 62 – 62 – 25 oe (= 31) **or** 180 – 25 – 124 oe (= 31)	
		C2	angle *x* = 31 with all figures correct and all correct reasons appropriate to their method, angles must be clearly labelled or on the diagram base angles of <u>isosceles triangle</u> are equal <u>angles</u> in a <u>triangle</u> add up to 180 <u>angles</u> on a straight <u>line</u> add up to180 the <u>exterior angle</u> of a triangle is <u>equal</u> to the sum of the <u>interior opposite angles</u>	Full solution must be seen. Angles must be clearly labelled on the diagram or otherwise identified. The key words underlined must be present in the reasons given.
		(C1	(dep on B1) for at least one reason appropriate to their method)
