15	583	P1	starts process using sine rule, eg $\frac{DB}{\sin 70} = \frac{39}{\sin 74}$	Accept any form of the sine rule with the correct values substituted.
		P1	for $(DB =) \frac{39}{\sin 74} \times \sin 70$ (= 38.1...)	
		P1	for angle BDC = 180 – 70 – 74 (= 36)	
		P1	(dep P1) for 0.5 × 52 × [DB] × sin“36”	
		A1	answer in range 582 to 583
