| | | | | |
|---|---|---|---|---|
| 23 | Proof | M1 | for first step, eg $4x^2 - 8x + 7 = 4(x^2 - \ldots)$ | |
| | | M1 | for $4(x - 1)^2 + \ldots$ | |
| | | C1 | for $4(x - 1)^2 + 3$ and statement, eg $4(x - 1)^2 \geq 0$<br>**or** minimum is at (1, 3) so the value is always positive | Statement must be supported by full working. |
