3 *BEG* is a triangle.

ABC and *DEF* are parallel lines.

Work out the size of angle *x*.
Give a reason for each stage of your working.

ABE = 180° – 110° = 70°

Co-interior angles on parallel lines add to 180°.

1 mark
Use the parallel lines

EBG = 180° – 70° – 35° = 75°

Angles on a straight line add to 180°.

BEG = 180° – 110° – 25° = 45°

Angles on a straight line add to 180°.

x = 180° – 75° – 45° = 60°

Angles in a triangle add to 180°.

1 mark
Complete the angle calculation

1 mark
Link correct parallel-line and triangle/straight-line reasons

1 mark
Correct angle

60 °

(Total for Question 3 is 4 marks)
