Question	Answer	Mark	Mark scheme	Additional guidance
17	$f = \frac{4d+3}{d+3}$	M1	for clearing the fraction eg $d(f-4) = 3(1-f)$ **or** $df - 4d = 3 - 3f$	Condone error in expansion of RHS for this mark
		M1	(dep M1) for isolating f terms in a correct equation eg $df + 3f = 3 + 4d$	
		M1	(dep on two terms in f) for factorising eg $f(d + 3) = 3 + 4d$	
		A1	oe
