Question	Answer	Mark	Mark scheme	Additional guidance
13	(9, 8)	P1	for setting up an equation for one dimension (width) of the pattern eg $2b - a = 8$ oe **or** $2x + y = 8$ oe	a and b are the width and length x is the difference between the length and width, y is the width of the rectangle
		P1	for setting up an equation for the other dimension (height) of the pattern eg $2b + a = 16$ oe **or** $2x + 3y = 16$ oe	
		P1	(dep P2) for a full process to solve for both variables eg $4b = 24$, $b = 6$ and $12 - a = 8$, $a = 4$ **or** $8 = 2y$, $y = 4$ and $8 = 2x + y$, $x = 2$	Both values correct implies this mark
		P1	(dep P3) for a full process to find one of the coordinates of C eg $3 + 6$ (= 9) or $4 + 4$ (= 8) **or** $3 + 2 + 4$ (= 9) or $4 + 4$ (= 8)
