Question	Answer	Mark	Mark scheme	Additional guidance
17	$x = \frac{1}{2}z^6$	M1	for setting up an equation eg $x = ky^2$ oe **or** $y = cz^3$ oe	Accept use of proportionality sign, eg $x \propto y^2$ or $y \propto z^3$ or $x \propto ky^2$ or $y \propto cz^3$
		M1	for eliminating y eg $x = k(cz^3)^2$ oe OR substitutes values in both equations, eg $32 = ky^2$ and $y = c2^3$	Accept use of proportionality sign, eg $32 \propto ky^2$ and $y \propto c2^3$
		M1	for substituting in 32 and 2 to find the constant, eg $32 = m2^6$ OR combines equations, eg $32 = k\,c^2 2^6$	
		A1	oe
