24 Each person in a fitness club is going to get a free gift.
Stan is going to order the gifts.

Stan takes a sample of 50 people in the fitness club.
He asks each person to tell him the gift they would like.

The table shows information about his results.

Gift	Number of people
sports bag	17
gym towel	7
headphones	11
voucher	15

There are 700 people in the fitness club.

(i) Work out how many sports bags Stan should order.

Sample fraction for bags = 17/50

Estimate = 17/50 × 700 = 238 bags

2 marks total
Scale sample to 700
238 sports bags

(2)

(ii) Write down any assumption you made **and** explain how this could affect your answer.

Assume the sample represents the whole club.

If it does not, 238 could be too high or too low.

1 mark
Representative sample
Otherwise estimate differs

(1)

(Total for Question 24 is 3 marks)
