4 Each person in a fitness club is going to get a free gift.
Stan is going to order the gifts.

Stan takes a sample of 50 people in the fitness club.
He asks each person to tell him the gift they would like.

The table shows information about his results.

Gift	Number of people
sports bag	17
gym towel	7
headphones	11
voucher	15

There are 700 people in the fitness club.

(i) Work out how many sports bags Stan should order.

Sports-bag estimate = (17/50) × 700

= 17 × 14 = 238 sports bags.

2 marks total
Use sample proportion
238 sports bags

(2)

(ii) Write down any assumption you made **and** explain how this could affect your answer.

Assume the sample represents all 700 members.

If not, the true bag demand could differ from 238.

1 mark
Sample represents members

(1)

(Total for Question 4 is 3 marks)
