

Question	Answer	Mark	Mark scheme	Additional guidance
18	Accurate figures with supportive working	M1 M1 M1 A1	for a correct first step eg $600 \div 30 (=20)$ or $120 \div 30 (=4)$ or $600 \times 120 (=72\ 000)$ or $30 \times 30 (=900)$ for finding an appropriate cost $2.5 \times "20" (=50)$ or $2.5 \times "4" (=10)$ OR number of tiles required $"72\ 000" \div "900" (=80)$ or $"4" \times "20" (=80)$ OR number they can afford $220 \div 2.5 (=88)$ for full method to get figures to compare eg cost to tile whole area eg $"80" \times 2.5$ OR number of tiles they need and number they can afford eg $"72\ 000" \div "900"$ and $220 \div 2.5$ for 200 OR 80 and 88 OR 72 000 and 79 200 OR 132 (cm) OR 660 (cm) SC B2 for answer of 60	Could work in m or cm Units must be consistent
