

Question	Answer	Mark	Mark scheme	Additional guidance
16 (a)	14	M1	for 4×5 and 3×-2 , the substitution may be seen in two separate calculations, eg $4 \times 5 (= 20)$ and $3 \times -2 (= -6)$	Note: $4e^2 + 8e = 12e^3$ for example gets B1 only Showing $\div 3$ by each side of equation is sufficient
		A1	cao	
		B2	for $4e^2 + 8e$	
		(B1	for $4e^2$ or $8e$)	
(c)	11	M1	for a correct first step eg $3 \times m - 3 \times 4 = 21$ oe or $m - 4 = 21 \div 3 (= 7)$ oe	Showing $\div 3$ by each side of equation is sufficient
		A1	cao
