

12 The graph shows the volume of liquid ( $L$  litres) in a container at time  $t$  seconds.

(a) Find the gradient of the graph.

(2)

(b) Explain what this gradient represents.

(1)

The graph intersects the volume axis at  $L = 4$

(c) Explain what this intercept represents.

(1)

(Total for Question 12 is 4 marks)
