Question	Answer	Mark	Mark scheme	Additional guidance
22	$1.5 < x < 5$ $-5 < x < -0.5$	M1	for a correct method to begin rearranging to solve for x eg $4x^2 - 4x > 3$ or $-\sqrt{25} < x < \sqrt{25}$	
		M1	for a full method to $(2x + 1)(2x - 3) > 0$	
		A1	for a set of critical values of ± 5 and -0.5 and 1.5	
		M1	for selecting correct inequality for one set of critical values eg $x > -5$ and $x < -0.5$ or $x < 5$ and $x > 1.5$ (could be implied by final answer)	
		A1	$1.5 < x < 5$ and $-5 < x < -0.5$ given as boundaries of x	Accept with an “and” or an “or” or neither
