16

barrel

The diagram shows the dimensions of a tank in the shape of a cuboid.

The tank is $\frac{1}{3}$ full of water.

The diagram also shows a barrel that contains water.
Tina is told that there is 18 000 cm^3 of water in the barrel.
Tina is going to empty all the water from the barrel into the tank.

(a) What will the depth of water in the tank then be?

..... cm

(4)

Tina finds out that the barrel contains less than 18 000 cm^3 of water.

(b) Explain what effect this will have on your answer to part (a).

.....

.....

.....

(1)

(Total for Question 16 is 5 marks)
