Question	Answer	Mark	Mark scheme	Additional guidance
11 (a)	$3x^3+17x^2+18x-8$	M1	for a method to find the product of two linear expressions eg 3 correct terms out of 4 terms or 4 terms ignoring signs	Note that (eg) $5x - 2$ in expansion of $(x + 2)(3x - 1)$ is to be regarded as 3 correct terms.
		M1	for a complete method to obtain all terms, half of which are correct (ft their first product) eg $3x^3+5x^2+20x+12x^2-2x-8$	First product must be quadratic but need not be simplified or may be simplified incorrectly
		A1	cao	
(b)	8.5	M1	for a correct first step eg $23- 2y = 4(y-7)$	
		M1	for isolating terms is y eg $4y + 2y = 23+ 28$	
		A1	oe	
(c)	2.11 and -1.11	M1	for a correct substitution into the quadratic formula	
		M1	for simplifying to the form $\frac{3\pm\sqrt{93}}{6}$ or one correct solution eg 2.10 to 2.1073 or -1.10 to -1.1073	
		A1	2.10 to 2.1073 and -1.10 to -1.1073
