Question	Answer	Mark	Mark scheme	Additional guidance
17	76	P1	for process to find an equation in a and b, eg $a \times 2^2 + b \times 2 = 26$ ($4a + 2b = 26$) or $a \times 3^2 + b \times 3 = 48$ ($9a + 3b = 48$)	
		P1	for process to find a pair of simultaneous equations and eliminate one unknown, eg $4a + 2b = 26$ and $9a + 3b = 48$ **and** process to eliminate one varaible	
		P1	for process to solve equations, eg $a = 3$ and $b = 7$	
		A1	cao
