22		$y = 0.4x - 17.4$	P1	for process to find p, e.g. $\sqrt{261-15^2}$
			P1	for process to find gradient of OA, e.g. $-15 \div 6$ $(=\frac{-5}{2})$
			P1	(dep on previous P1) for process to find the perpendicular gradient using $-\frac{1}{m}$ or states gradient as $\frac{2}{5}$
			P1	for process to find the y-intercept of the gradient, e.g. $-15 = \frac{2}{5} \times 6 + c$
