

Paper: 1MA1/2H				
Question	Answer	Mark	Mark scheme	Additional guidance
6	7	P1	process to use gradient eg $y = 3x + c$ or $c = -6$ or $\frac{15 - 9}{d - 5}$	Condone use of a letter other than d , for d
		P1	or $(15 - 9) \div 3$ or $(6, 12)$ (dep) full process to rearrange equation formed to isolate d	Must show processes to get as far as $d =$
			eg rearrangement of $15 = 3d - 6$ or $3 = \frac{15 - 9}{d - 5}$ or for $5 + \frac{15 - 9}{3}$	Award P2 for an answer of $(7, 15)$
