

18	(a)	Graph	B3 for a correct line between $x = -3$ and $x = 3$ (B2 for a correct straight line segment through at least 3 of $(-3, 11)$, $(-2, 8)$, $(-1, 5)$, $(0, 2)$, $(1, -1)$, $(2, -4)$, $(3, -7)$ or for all of these points plotted but not joined OR for a line drawn with a negative gradient through $(0, 2)$ and clear intention to use a gradient of -3, eg line through $(0, 2)$ going across 1 squares and up 3 squares) (B1 for at least 2 correct points stated or plotted OR for a line drawn with a negative gradient through $(0, 2)$ OR a line with gradient -3)	Ignore any incorrect points. Points need not be plotted for a correct line (segment) drawn Ignore any incorrect points Coordinates may be in a table or in working
	(b)	$y = -3x + c$	B1 for $y = -3x + c$ oe where $c \neq 2$ or absent
