

11 Here are some fractions.

$$\frac{4}{6}$$

$$\frac{20}{30}$$

$$\frac{6}{9}$$

$$\frac{8}{12}$$

$$\frac{10}{16}$$

One of these fractions is **not** equivalent to $\frac{2}{3}$

(a) Which fraction?

.....
(1)

(b) Work out $\frac{4}{5} - \frac{1}{15}$

.....
(2)

(Total for Question 11 is 3 marks)
