

24	(a)	1800 to 2000	B1	for using at least one quantity rounded, eg using 6 km or 20 minutes	May work in metres Calculation could be done in stages. Mark can be given if figures are not rounded.
			P1	for complete process to find distance, eg $\frac{19}{60} \times 5.7$ or $\frac{20}{60} \times 6$ or $\frac{20}{60} \times 5.7$ or $\frac{19}{60} \times 6$ oe	
			A1	for answer in range 1800 to 2000	
	(b)	decision with reason	C1	(dep on correct use of distance = speed $\times$ time) for reason related to their response to part (a), eg overestimate as speed and time are rounded up
