

1	16.2	M1	for a correct first step to find BC, eg $19^2 = 10^2 + BC^2 \text{ or } 19^2 - 10^2 (= 261) \text{ or } \sqrt{19^2 - 10^2} \text{ or } \sqrt{261} \text{ or } 3\sqrt{29}$	Can use alternative letter for BC provided intention is clear If using an alternative method using trigonometry must have BC as the only unknown
		A1	for answer in the range 16.1 to 16.2	ISW incorrect rounding if answer given in range
