Question	Answer	Mark	Mark scheme	Additional guidance
16	Result shown	M1	for starting to work, eg with ratios B : G = 6 : 1 oe or B + G ; R + Y = 2 : 1 oe **OR** eg with fractions $B = \frac{6}{7}$ (B + G) oe or $B + G = \frac{2}{3}$ (B + G + R + Y) oe **OR** eg with numbers in the correct ratio 1G, 6B or 14 G + B, 7 R + Y	Students may work with ratios, fractions or numbers of counters Award marks for any appropriate method.
		M1	for complete method, eg using ratios B : G : R + Y = 6 : 1 : $3\frac{1}{2}$ oe **OR** eg using fractions $B = \frac{6}{7}$ (B + G) oe and $B + G = \frac{2}{3}$ (B + G + R + Y) oe **OR**	
			eg using numbers of counters 2G, 12B, 7R + Y	
		M1	for method to find the proportion of blue counters, eg from ratios $\frac{[6]}{[6] + [1] + \left[3\frac{1}{2}\right]}$ oe **OR** eg from fractions $\frac{6}{7} \times \frac{2}{3}$ **OR** eg using numbers of counters $\frac{[12]}{[2] + [12] + [7]}$	
		C1	for figure rounding to 57 seen from correct working
