

Question		Answer	Mark	Mark scheme	Additional guidance
18	(a)(i)	1500	B1	cao	Drawing a right-angled triangle is insufficient without calculation shown Use of change in y over change in x
	(ii)	No (supported)	C1	for no with reason, eg five times the original is 7500 and investment is worth between 7200 and 7300 after 12 years	
	(b)(i)	490	M1	for drawing a suitable tangent at $n = 7$	
			M1	for a full method to find the gradient of the tangent at $n = 7$	
			A1	for answer in the range 450 to 500 from correct working or ft their tangent	
	(ii)	Interpretation	C1	for explanation, Acceptable examples	
				the rate at which the investment grows (at $n = 7$) the amount per year that the investment increases the investment increases at £490 per year (when $n = 7$ years) Not acceptable examples rate of change increase in the investment interest gained
