Question	Answer	Mark	Mark scheme	Additional guidance
14	0.1710789483	B1	for 28.35 **or** 28.45 **or** 132.5 **or** 137.5	Could gain B1 M1 M1 if working is in mm, but final answer must be in newtons/cm^2
		M1	for using force ÷ length^2	
		M1	for a correct process to find UB bound for pressure, eg [UB of force] ÷ [LB of length]^2	where 135 < [UB of force] ≤ 137.5 and 28.35 ≤ [LB of length] < 28.4
		A1	for answer in the range 0.171 to 0.1711 from correct working
