Question	Answer	Mark	Mark scheme	Additional guidance
20	(9, –2)	P1	for $(-7)^2 + 6^2 (= 85)$ **and** $x^2 + y^2 = 85$	
		P1	for substituting to eliminate x or y, eg $(5 - 2y)^2 + y^2 = 85$ **or** $x^2 + \left(\frac{5-x}{2}\right)^2 = 85$	
		P1	for writing in a suitable form ready for solution, eg $5y^2 - 20y - 60 (= 0)$ **or** $y^2 - 4y - 12 (= 0)$ **or** $5x^2 - 10x - 315 (= 0)$ **or** $x^2 - 2x - 63 (= 0)$	
		P1	(dep on 1st two P marks) for process to solve quadratic equation of form $ax^2 + bx + c (= 0)$ eg $(y - 6)(y + 2) (= 0)$ **or** $(x - 9)(x + 7) \quad (= 0)$ **or** $\frac{--4 \pm \sqrt{(-4)^2 - 4 \times 1 \times -12}}{2 \times 1}$ **or** $\frac{--2 \pm \sqrt{(-2)^2 - 4 \times 1 \times -63}}{2 \times 1}$
