Question	Answer	Mark	Mark scheme	Additional guidance
7 (a)	685	M1	for a method to convert minutes to hours, eg 24 ÷ 60 (= 0.4) oe **or** 144 ÷ 60 (= 2.4) oe **or** a method to convert a speed in km per minute to a speed in km/h, eg "11.4…" × 60	
		M1	for using distance ÷ time, eg 1644 ÷ 2.4 **or** 1644 ÷ 2.24 **or** 1644 ÷ 144 (= 11.4...)	
		A1	cao	
(b)	Shown	M1	for a method to convert 25 m/s to km/h or 80 km/h to m/s, eg $25 \times \frac{60 \times 60}{1000}$ or $80 \times \frac{1000}{60 \times 60}$	Accept methods to convert both speeds to km/s or m/h
		A1	for showing that 25 m/s = 90 km/h **or** 80 km/h = 22.2... m/s
