14 Year 9 students from Halle School were asked to choose one language to study.

The table shows information about their choices.

Language	Number of students	Angle
French	56	168°
Spanish	40	120°
German	24	72°

(a) Draw an accurate pie chart to show this information.

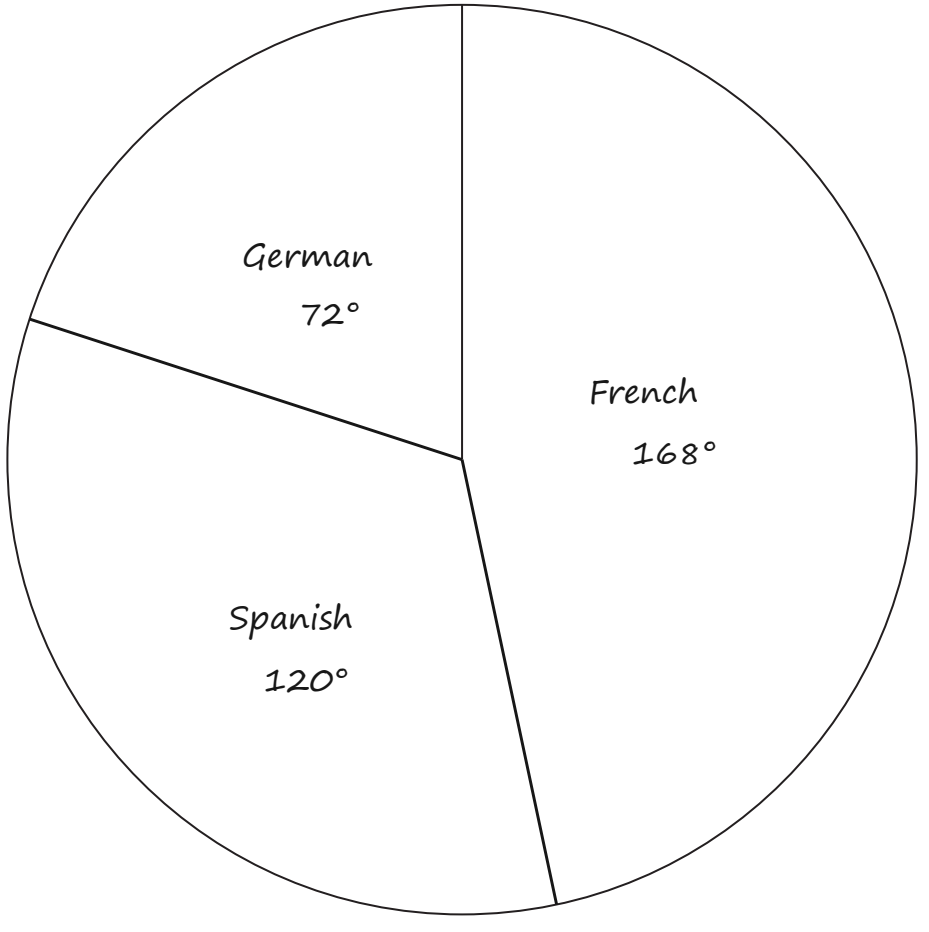

Total = 56 + 40 + 24 = 120 students

Students	Angle
120	360°
1	3°

÷120 ↓ ÷120 ↓

3° per student

56 × 3 = 168°

(3)

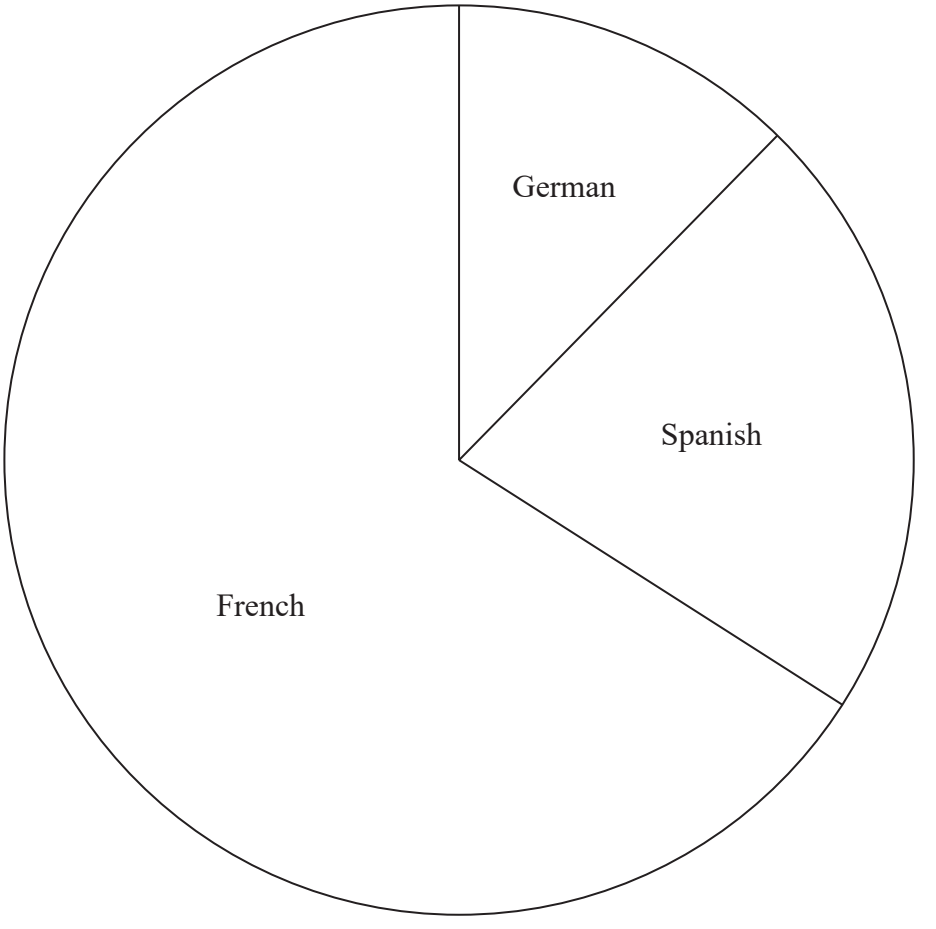

1 mark
Correct angle calculation

1 mark
All angles within 2°

1 mark
Correct labels

Year 9 students from Lowry School were also asked to choose one language to study.

This accurate pie chart shows information about their choices.

Shameena says,

"The pie chart shows that French was chosen by more Year 9 students at Lowry School than at Halle School."

(b) Is Shameena right?
You must explain your answer.

No. We do not know the total number of students at Lowry School. A larger sector shows a larger proportion, but does not prove a larger number.

1 mark (1)
No, with the missing-total reason

(Total for Question 14 is 4 marks)
