16 $v = u + at$

$u = 1 \qquad a = -3 \qquad t = \frac{1}{2}$

Work out the value of v.

$v = 1 + (-3) \times \frac{1}{2}$

$v = 1 - 1.5 = -0.5$

(+) (−) cancel; −0.5 remains

1 mark
Substitute with operations

1 mark
Correct signed value

$v =$ −0.5

(Total for Question 16 is 2 marks)
