8 The cumulative frequency graph shows some information about the heights, in cm, of 60 students.

Work out an estimate for the number of these students with a height greater than 160 cm.

At 160 cm, cumulative frequency ≈ 48.

1 mark
Read the original curve at 160 cm

Taller than 160 cm: 60 – 48 = 12 students.

1 mark
Subtract from 60; accept 11.8 to 12.2

12

(Total for Question 8 is 2 marks)
