9 The diagram shows triangle **A** drawn on a grid.

Kyle reflects triangle **A** in the x-axis to get triangle **B**.
He then reflects triangle **B** in the line $y = x$ to get triangle **C**.

Amy reflects triangle **A** in the line $y = x$ to get triangle **D**.
She is then going to reflect triangle **D** in the x-axis to get triangle **E**.

Amy says that triangle **E** should be in the same position as triangle **C**.

Is Amy correct?
You must show how you get your answer.

Kyle: $(x, y) \rightarrow (x, -y) \rightarrow (-y, x)$.

Amy: $(x, y) \rightarrow (y, x) \rightarrow (y, -x)$.

2 marks total
Correct final triangles C and E on the grid

No. C and E are in different positions.

The order of these reflections matters.

1 mark
No, supported by both correct final images

(Total for Question 9 is 3 marks)
