13

Write down the three inequalities that define the shaded region.

All three boundary lines are solid: include equality.

Horizontal boundary: $y = -2$

The region is above it: $y \geq -2$.

1 mark
Identify y = −2

Through (0, 0) and (2, 2): $y = x$

The region is above this line: $y \geq x$.

1 mark
Identify y = x

The other line has gradient ½ and intercept 1.

The region is below it: $y \leq 0.5x + 1$.

$y \geq -2$

$y \geq x$

$y \leq 0.5x + 1$

1 mark
Identify y = 0.5x + 1

1 mark
All three inequality signs correct

(Total for Question 13 is 4 marks)
