13 A piece of wire is 240 cm long.

Peter cuts two 45 cm lengths off the wire.
He then cuts the rest of the wire into as many 40 cm lengths as possible.

Work out how many 40 cm lengths of wire Peter cuts.

Two pieces use $2 \times 45 = 90$ cm.

Wire left $= 240 - 90 = 150$ cm.

1 mark
Find the length remaining

$3 \times 40 = 120$ cm fits.

$4 \times 40 = 160$ cm is too long.

1 mark
Find the greatest whole number of 40 cm pieces

Peter can cut 3 pieces (30 cm remains).

1 mark
3 complete lengths
