28 Make g the subject of the formula $T = \sqrt{\frac{g+6}{2}}$

square square

$$T^2 = \frac{g+6}{2}$$

1 mark
Square both sides

×2 ×2

$$2T^2 = g + 6$$

1 mark
Multiply both sides by 2

−6 −6

$$2T^2 - 6 = g$$

$$g = 2T^2 - 6$$

1 mark
Isolate g

$g = 2T^2 - 6$

(Total for Question 28 is 3 marks)
