18 The diagram shows a rectangular garden path.

Wasim is going to cover the path with paving stones.
Each paving stone is a square of side 30 cm.
Each paving stone costs £2.50

Wasim has £220 to spend on paving stones.

Show that he has enough money to buy all the paving stones he needs.

Along: 600 ÷ 30 = 20 tiles

1 mark
Divide a path length by the tile length.

Across: 120 ÷ 30 = 4 tiles

Total: 20 × 4 = 80 tiles

1 mark
Find all 80 tiles.

	Tiles	GBP	
×8	1	2.50	×8
	8	20	
×10	80	200	×10

1 mark
Find the full cost of 80 tiles.

80 tiles cost £200.

1 mark
Accurate cost £200; compare with £220.

£220 – £200 = £20 left.

Yes, he has enough money.

(Total for Question 18 is 4 marks)
