1 There are only blue cubes, red cubes and yellow cubes in a box.

The table shows the probability of taking at random a blue cube from the box.

Colour	blue	red	yellow
Probability	0.2	0.4	0.4

The number of red cubes in the box is the same as the number of yellow cubes in the box.

(a) Complete the table.

Remaining probability = 1 − 0.2 = 0.8

1 mark
Find the remaining probability.

Each colour: 0.8 ÷ 2 = 0.4

1 mark
0.4 in each empty cell.

(2)

There are 12 blue cubes in the box.

(b) Work out the total number of cubes in the box.

	Probability	**Cubes**	
	0.2	12	
×5	1	60	×5

1 mark
Use blue cubes as 0.2 of all cubes.

1 mark
60 cubes in total.

60

(2)

(Total for Question 1 is 4 marks)
