10 The graphs with equations $3y + 2x = \frac{1}{2}$ and $2y - 3x = -\frac{113}{12}$ have been drawn on the grid below.

intersection

1 mark
Read where the two lines cross.

Using the graphs, find estimates of the solutions of the simultaneous equations

$$3y + 2x = \frac{1}{2}$$

$$2y - 3x = -\frac{113}{12}$$

From the grid: $x \approx 2.25$, $y \approx -1.33$

$x =$ 2.25

$y =$ -1.33

1 mark
Both coordinates in tolerance.

(Total for Question 10 is 2 marks)
