20 (a) Solve $14n > 11n + 6$

$14n > 11n + 6$

$-11n \qquad -11n$

$3n > 6$

$\div 3 \qquad \div 3$

$n > 2$

1 mark
Subtract 11n from both sides.

1 mark
n > 2.

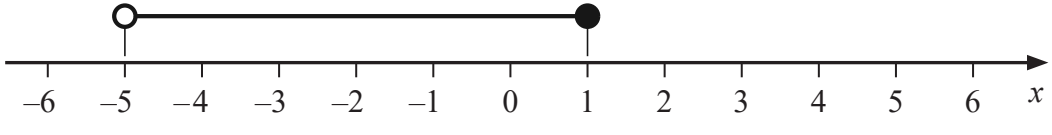

$n > 2$

(2)

(b) On the number line below, show the set of values of x for which $-2 < x + 3 \leqslant 4$

$-2 - 3 < x \leq 4 - 3$

$-5 < x \leq 1$

1 mark
Subtract 3 from all three parts.

1 mark
Join −5 to 1.

1 mark
Open at −5; closed at 1.
