**3** Hannah is planning a day trip for 195 students.

She asks a sample of 30 students where they want to go.
Each student chooses one place.

The table shows information about her results.

| Place | Number of students |
|---|---|
| Theme Park | 10 |
| Theatre | 5 |
| Sports Centre | 8 |
| Seaside | 7 |

(i) Work out how many of the 195 students you think will want to go to the Theme Park.

Sample proportion = 10/30 = 1/3

**1 mark**
Use the sample proportion.

Estimate = 195 × 1/3 = 65 students

**1 mark**
65 students.

65

**(2)**

(ii) State any assumption you made **and** explain how this may affect your answer.

**1 mark**
State and explain the assumption.

Assume the sample represents all 195 students.

If it is biased, the estimate may be inaccurate.

**(1)**

**(Total for Question 3 is 3 marks)**
