7 £360 is shared between Abby, Ben, Chloe and Denesh.

The ratio of the amount Abby gets to the amount Ben gets is 2 : 7

Chloe and Denesh each get 1.5 times the amount Abby gets.

Work out the amount of money that Ben gets.

A : B : C : D = 2 : 7 : 3 : 3

(C and D are 1.5 × Abby.)

Total parts = 2 + 7 + 3 + 3 = 15

One part = £360 ÷ 15 = £24

Ben gets 7 × £24 = £168

1 mark
C and D are 3 parts each.

1 mark
15 parts in total.

1 mark
£24 per part.

1 mark
Ben gets £168.

168

£.....

(Total for Question 7 is 4 marks)
