26 The table shows information about the heights of 80 plants.

Height (h cm)	Frequency	Cumulative
$10 < h \leqslant 20$	7	7
$20 < h \leqslant 30$	13	20
$30 < h \leqslant 40$	14	34
$40 < h \leqslant 50$	12	46
$50 < h \leqslant 60$	16	62
$60 < h \leqslant 70$	18	80

(a) Find the class interval that contains the median.

Median positions: 40th and 41st.

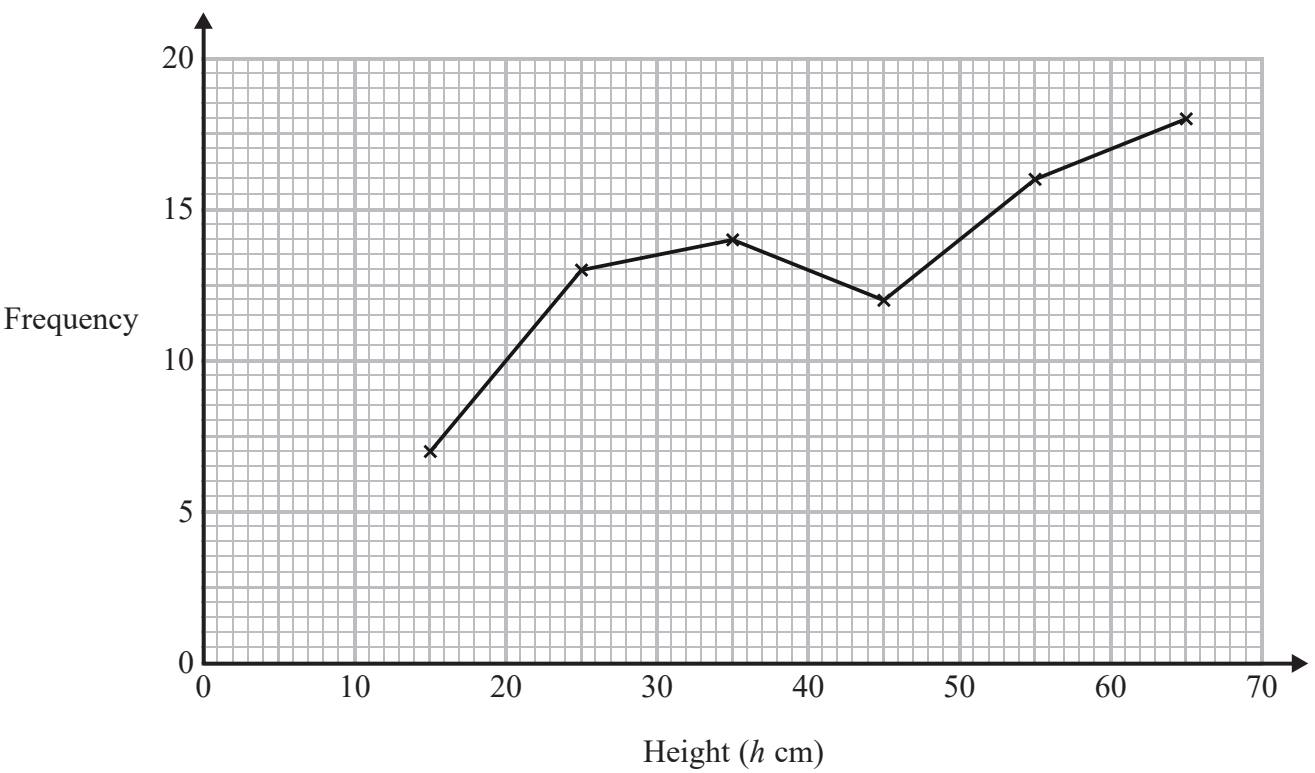

Both lie after 34 and at or before 46.

1 mark
The class 40 < h ≤ 50.

$40 < h \leq 50$

(1)

(b) On the grid, draw a frequency polygon for the information in the table.

(2)

2 marks total
Plot each class midpoint at its frequency; join with straight lines.

(Total for Question 26 is 3 marks)
