18

Phone calls cost £y for x minutes.

The graph gives the values of y for values of x from 0 to 5

(a) (i) Give an interpretation of the intercept of the graph on the y-axis.

A fixed starting charge of £0.50.

1 mark
Fixed charge

(ii) Give an interpretation of the gradient of the graph.

The price increases by £1.50 per minute.

1 mark
Cost per minute

(2)

(b) Find the equation of the straight line in the form $y = mx + c$

Gradient $m = \frac{3}{2} = 1.5$

1 mark
Rise ÷ run

y-intercept $c = 0.5$.

1 mark
Use m = 1.5

$y = 1.5x + 0.5$

1 mark
y = 1.5x + 0.5

(3)

(Total for Question 18 is 5 marks)
