7 Work out an estimate for the value of $\dfrac{43.2 \times \sqrt{99.05}}{0.193}$

$43.2 \approx 40$, $99.05 \approx 100$, $0.193 \approx 0.2$.

1 mark
Round sensibly

$\sqrt{99.05} \approx \sqrt{100} = 10$.

Estimate $= \dfrac{40 \times 10}{0.2} = 400 \div 0.2$

1 mark
Partially evaluate

$= 4000 \div 2 = 2000$

1 mark
2000

(Total for Question 7 is 3 marks)
