**17** (a) Simplify $y^3 + y^3$

$y^3 + y^3 = 2y^3.$

**1 mark**
$2y^3$

**(1)**

(b) Factorise $m^2 + m$

| × | m | +1 |
|---|---|---|
| m | $m^2$ | +m |

$m(m + 1)$

**1 mark**
m(m + 1)

**(1)**

(c) Make $h$ the subject of the formula $c = 3h + 5$

$c = 3h + 5$

$-5 \quad -5$

$c - 5 = 3h$

$\div 3 \quad \div 3$

$h = \frac{c - 5}{3}$

**1 mark**
−5 on both sides

**1 mark**
h = (c − 5)/3

**(2)**

**(Total for Question 17 is 4 marks)**
